

CSE 411: Artificial Intelligence (Elective Course #6)

**400 Level, Mechatronics Engineering
2nd Term 2016/2017, Lecture #9**

Hazem Shehata

Dept. of Computer & Systems Engineering
Zagazig University

May 8th, 2017

Credits to Dr. Mohamed El Abd for the slides

Adminstrivia

Notes

- Midterm:
 - Done marking!
 - Solution was posted!

Course Info:

- Website: <http://hshehata.github.io/courses/zu/cse411/>
- Office hours: Sunday 11:30am - 12:30pm

Introduction

Knowledge-based agents

- **Knowledge-based agents** are agents that can:
 - store knowledge → **knowledge base (KB)**.
 - deduce new facts → **inferencing**.

Introduction

Knowledge-based agents

- **Knowledge-based agents** are agents that can:
 - store knowledge → **knowledge base (KB)**.
 - deduce new facts → **inferencing**.
- KB includes set of assertions about environment:
 - **facts**.
 - **rules**.

Introduction

Knowledge-based agents

- **Knowledge-based agents** are agents that can:
 - store knowledge → **knowledge base (KB)**.
 - deduce new facts → **inferencing**.
- KB includes set of assertions about environment:
 - **facts**.
 - **rules**.
- These assertions are **sentences** represented in a given **logic**.

Propositional Logic

Syntax

- **Propositional logic** is a very simple yet powerful logic.

Outline

Logical Agents (Continued)

**Propositional logic
(Continued)**

Weather

Forecasting

Example

Requirements & Reading Material

Propositional Logic

Syntax

- **Propositional logic** is a very simple yet powerful logic.

- **PL syntax:**

Sentence	::=	Atomic-Sentence Complex-Sentence
Atomic-Sentence	::=	TRUE FALSE P Q R ...
Complex-Sentence	::=	(Sentence) \neg Sentence Sentence \wedge Sentence Sentence \vee Sentence Sentence \Rightarrow Sentence Sentence \Leftrightarrow Sentence

Propositional Logic

Syntax

- **Propositional logic** is a very simple yet powerful logic.

- **PL syntax:**

Sentence	::=	Atomic-Sentence Complex-Sentence
Atomic-Sentence	::=	TRUE FALSE P Q R ...
Complex-Sentence	::=	(Sentence) \neg Sentence Sentence \wedge Sentence Sentence \vee Sentence Sentence \Rightarrow Sentence Sentence \Leftrightarrow Sentence

- Ex.:
 - " $(A \wedge B) \Rightarrow \neg C$ " is a well-formed PL formula.
 - " $A \wedge \Rightarrow B$ " is not a well-formed PL formula!

Outline

Logical
Agents
(Continued)

Introduction

Propositional logic
(Continued)

Weather
Forecasting
Example

Requirements
& Reading
Material

Propositional Logic

Semantics

• PL semantics:

P	Q	$TRUE$	$FALSE$	$\neg P$	$P \wedge Q$	$P \vee Q$	$P \Rightarrow Q$	$P \Leftrightarrow Q$
F	F	T	F	T	F	F	T	T
F	T	T	F	T	F	T	T	F
T	F	T	F	F	F	T	F	F
T	T	T	F	F	T	T	T	T

Outline

Logical
Agents
(Continued)

Introduction

Propositional logic
(Continued)

Weather

Forecasting

Example

Requirements
& Reading
Material

Propositional Logic

Semantics

- PL semantics:

P	Q	$TRUE$	$FALSE$	$\neg P$	$P \wedge Q$	$P \vee Q$	$P \Rightarrow Q$	$P \Leftrightarrow Q$
F	F	T	F	T	F	F	T	T
F	T	T	F	T	F	T	T	F
T	F	T	F	F	F	T	F	F
T	T	T	F	F	T	T	T	T

- Logical entailment:** α entails β (i.e., $\alpha \models \beta$) if and only if every model that satisfies α also satisfies β .

Outline

Logical
Agents
(Continued)

Introduction

Propositional logic
(Continued)

Weather
Forecasting
Example

Requirements
& Reading
Material

Propositional Logic

Semantics

- **PL semantics:**

P	Q	$TRUE$	$FALSE$	$\neg P$	$P \wedge Q$	$P \vee Q$	$P \Rightarrow Q$	$P \Leftrightarrow Q$
F	F	T	F	T	F	F	T	T
F	T	T	F	T	F	T	T	F
T	F	T	F	F	F	T	F	F
T	T	T	F	F	T	T	T	T

- **Logical entailment:** α entails β (i.e., $\alpha \models \beta$) if and only if every model that satisfies α also satisfies β .
- Inference techniques to prove entailment in PL include:
 - Truth tables.
 - Rules.
 - Resolution.
 - Forward chaining.
 - Backward chaining (**Canceled!**).

& Reading
Material

Propositional logic

Definitions

- **Validity:** a sentence α is valid if it's TRUE in all models.
 - Ex.: $P \vee \neg P$ is a valid sentence.
 - Valid sentences are also known as **tautologies**.

Propositional logic

Definitions

- **Validity:** a sentence α is valid if it's TRUE in all models.
 - Ex.: $P \vee \neg P$ is a valid sentence.
 - Valid sentences are also known as **tautologies**.
- **Satisfiability:** a sentence α is satisfiable if it's TRUE in some models.
 - Ex.: KB, which equals $R_1 \wedge R_2 \wedge R_3 \wedge R_4 \wedge R_5$, is satisfiable because it's TRUE in three models.

Standard logical equivalences

$$(\alpha \wedge \beta) \equiv (\beta \wedge \alpha) \quad \text{commutativity of } \wedge$$

$$(\alpha \vee \beta) \equiv (\beta \vee \alpha) \quad \text{commutativity of } \vee$$

$$((\alpha \wedge \beta) \wedge \gamma) \equiv (\alpha \wedge (\beta \wedge \gamma)) \quad \text{associativity of } \wedge$$

$$((\alpha \vee \beta) \vee \gamma) \equiv (\alpha \vee (\beta \vee \gamma)) \quad \text{associativity of } \vee$$

$$\neg(\neg\alpha) \equiv \alpha \quad \text{double-negation elimination}$$

$$(\alpha \Rightarrow \beta) \equiv (\neg\beta \Rightarrow \neg\alpha) \quad \text{contraposition}$$

$$(\alpha \Rightarrow \beta) \equiv (\neg\alpha \vee \beta) \quad \text{implication elimination}$$

$$(\alpha \Leftrightarrow \beta) \equiv ((\alpha \Rightarrow \beta) \wedge (\beta \Rightarrow \alpha)) \quad \text{biconditional elimination}$$

$$\neg(\alpha \wedge \beta) \equiv (\neg\alpha \vee \neg\beta) \quad \text{De Morgan}$$

$$\neg(\alpha \vee \beta) \equiv (\neg\alpha \wedge \neg\beta) \quad \text{De Morgan}$$

$$(\alpha \wedge (\beta \vee \gamma)) \equiv ((\alpha \wedge \beta) \vee (\alpha \wedge \gamma)) \quad \text{distributivity of } \wedge \text{ over } \vee$$

$$(\alpha \vee (\beta \wedge \gamma)) \equiv ((\alpha \vee \beta) \wedge (\alpha \vee \gamma)) \quad \text{distributivity of } \vee \text{ over } \wedge$$

Propositional logic

Inferencing with rules

- Another approach for inferencing is ***Inferencing with Rules.***

Propositional logic

Inferencing with rules

- Another approach for inferencing is ***Inferencing with Rules.***
- The idea is to use ***inferencing rules*** that allow us to deduce new sentences (conclusions) that are TRUE when old sentences (premises) are TRUE.

Propositional logic

Inferencing with rules

- Another approach for inferencing is ***Inferencing with Rules***.
- The idea is to use ***inferencing rules*** that allow us to deduce new sentences (conclusions) that are TRUE when old sentences (premises) are TRUE.
- This method is **sound** (given that inference rules are sound) but **might not be complete** (depending on available inference rules).

Propositional logic

Inferencing with rules

- Another approach for inferencing is ***Inferencing with Rules***.
- The idea is to use ***inferencing rules*** that allow us to deduce new sentences (conclusions) that are TRUE when old sentences (premises) are TRUE.
- This method is **sound** (given that inference rules are sound) but **might not be complete** (depending on available inference rules).
- Inferencing-with-truth-tables is sound and complete.

Propositional logic

Inferencing with rules

Inference Rules

Rule Name	Premises	Derived Conclusion
Modus Ponens	$A, A \Rightarrow B$	B
And Introduction	A, B	$A \wedge B$
And Elimination	$A \wedge B$	A
Unit Resolution	$A \vee B, \neg B$	A
Resolution	$A \vee B, \neg B \vee C$	$A \vee C$

Additional rules based on logical equivalences

Biconditional Elimination	$A \Leftrightarrow B$	$(A \Rightarrow B) \wedge (B \Rightarrow A)$
Biconditional Introduction	$(A \Rightarrow B) \wedge (B \Rightarrow A)$	$A \Leftrightarrow B$
Implication Elimination	$A \Rightarrow B$	$\neg A \vee B$
Implication Introduction	$\neg A \vee B$	$A \Rightarrow B$

- Let's say you have three propositional symbols:
 - **P:** It's hot.
 - **Q:** It's humid.
 - **R:** It's raining.
- And you have the following rules:
 - **If** it is hot and humid, **then** it is raining.
 - **If** it is humid, **then** it is hot.

Requirements

What do I need from you

- When given a certain problem you should be able to:
 - Express the problem in terms of propositional logic (i.e. write the KB in form of rules or CNF).

Requirements

What do I need from you

- When given a certain problem you should be able to:
 - Express the problem in terms of propositional logic (i.e. write the KB in form of rules or CNF).
 - Draw AND-OR graph of the KB.

Requirements

What do I need from you

- When given a certain problem you should be able to:
 - Express the problem in terms of propositional logic (i.e. write the KB in form of rules or CNF).
 - Draw AND-OR graph of the KB.
 - Inference certain conclusions using:
 - Truth tables.
 - Rules.
 - Resolution.
 - Forward chaining.
 - Backward chaining.

Requirements

What do I need from you

- When given a certain problem you should be able to:
 - Express the problem in terms of propositional logic (i.e. write the KB in form of rules or CNF).
 - Draw AND-OR graph of the KB.
 - Inference certain conclusions using:
 - Truth tables.
 - Rules.
 - Resolution.
 - Forward chaining.
 - Backward chaining.
- Answer descriptive questions.

Reading Material

Which parts of the textbook are covered
